SHOOTING AHEAD:

When for whatever reason, a shooter knows in advance that they will be unable to shoot, that shooter will be allowed to shoot ahead as needed. Ahead shooting of more than three (3) weeks shall require prior approval. When shooting ahead, all scores must be posted, the score sheet date stamped and signed by the shooter, and the score sheets marked as "shooting ahead".

USE OF BACKUP RESERVE SCORES: You are not required to shoot a Backup Reserve Score. It is offered as an option.

Backup Reserve scores are to be used ONLY when a team member is unable to attend a weekly shooting date and are not be used in lieu of a lesser score. On the final week of League, if the Backup Reserve Score is unused, it may be used for that week's score.

Scores shot for the backup reserve shall be indicated as such on the score sheet. The scores will be posted on the scoreboard and held in reserve in case unforeseen circumstances prevent a shooter from shooting on any particular shooting day. In other words, all shooters showing up to shoot must post the score they shoot that day and are not allowed to substitute their backup reserve score to improve target count. **In the event no reserve score has been posted, a zero score shall be posted.** There shall be no averaging of shooter scores for missed shooting. After a shooter uses their backup reserve score, they may shoot another backup reserve score to be used in the future.
